Summer Grounds Maintenance Service:

Grass will be cut every 3 weeks in growing season, and all edges will be trimmed.

The area will be cleared of all plant debris, litter, and fallen leaves.

Shrubs and planted areas will be maintained, and will be minimum 90% weed free.

The edges around borders, fences and buildings will be re-cut twice a year.

All sloped areas too steep to mow without damaging grass to be strimmed or cut every 3 weeks in growing season.

Applying approved weed killer to control weed growth in planted areas 2–4 times per year.

Report all dead and diseased plants and trees for CAH instruction in respect of removal and replacement, including all appropriate horticultural advice.

Remove all litter and debris from hard landscaped areas, all paths and patios, parking areas and non-adopted roads and accesses. Maintain external refuse areas.

Winter Grounds Maintenance Service:

Litter will continue to be removed from hotspots.

We will also visit to remove the final leaves once they have all fallen.

There will be scheduled visits in which we will:

Undertake main pruning cut of shrubs, trees and hedges, which will cover minor works, to prevent vegetation becoming unruly.

Clear all surface water channels, gullies and drain runs and flush with clean water twice per season.

Remove all litter and debris from hard landscaped areas, all paths and patios, parking areas and non-adopted roads and accesses. Maintain external refuse areas.
